AI MASTERY LAB

WORKFORCE ENABLEMENT · AI LITERACY

The Future Won't Wait.
Master AI and Stay Ahead.

AI MASTERY LAB

ONE METHOD FOR EVERY DEPARTMENT

Licences arrive. Training does not. We close that gap.

One programme built for technical and non-technical people alike: a single repeatable prompting method, applied to real writing, research and documentation work. Version 1 is free and open to your entire workforce.

THE HONEST POSITION

Do not launch this across the whole company. Begin with one department, run it as a pilot, measure the result, then decide.

33 LESSONS
ACROSS SIX FOUNDATION COURSES

FREE
VERSION 1, ALL STAFF

THE SHORT VERSION

1. **WHAT IT IS**
   Module one gets 6 courses and thirty-three lessons that take every employee from AI literacy to daily application.

2. **WHO IT IS FOR**
   Every employee, technical or not. Role-specific tracks of one to three hours each for Human Resources, Consulting, Marketing, Finance, Sales and Leadership.

3. **HOW IT STARTS**
   One department, run as a pilot. If Version 1 does nothing for your team, Version 2 will not either.

AI MASTERY LAB

CURRICULUM · TRACKS · CAPSTONE

WHAT YOU GET

Four modules. One method. Certification at the end.

WHAT IS COVERED — MODULES AND DELIVERY

1. **FOUNDATION CURRICULUM**
   Six courses, thirty-three lessons. From AI literacy to daily application through one repeatable prompting method.
2. **SECURE & RESPONSIBLE AI**
   Seven lessons on risk, data privacy, confidentiality and where human oversight still matters. The longest course.
3. **ROLE-SPECIFIC TRACKS**
   One to three hours each for Human Resources, Consulting, Marketing, Finance, Sales and Leadership. No material repeats.
4. **CAPSTONE & CERTIFICATION**
   A live workshop where every participant builds one real workflow, then assessment and certification per learner.
5. **WRITTEN BY PRACTITIONERS**
   The security and responsible-AI material is written by the people who run our engagements, not licensed in.
6. **LESSONS THAT FIT A WORKDAY**
   Six to nine minutes each, taken at each person's own pace, so the programme survives real workloads.

HOW IT ROLLS OUT - ONE DEPARTMENT FIRST

SCOPE	ENROL	PRACTISE	MEASURE	CERTIFY	EXTEND
Pick one department and the workflows that consume its time.	Foundation curriculum opened to that team at no cost.	Role-specific track applied to the team's own real work.	Assessment scores and whether the method is used unprompted.	Live capstone workshop, one real workflow built per person.	Decide the next department from the measured result.

Module 1: AI for Everyone

A beginner-friendly module for all ages and departments. No prerequisites or technical skills required just basic English proficiency

Module 2: Tailored AI Tracks

A specialised module tailored to specific departments, roles, and workflows, focusing on practical and relevant AI applications.

THE EVIDENCE - WHY TRAINING IS THE GAP

25%	69%	1 IN 5	FREE
Use AI regularly	**Suspect shadow AI**	**See a real return**	**Version 1 curriculum**
Share of the workforce, reported by chief executives. IBM IBV, May 2026.	Organisations suspecting prohibited use of public AI tools. Gartner, Nov 2025.	Organisations qualifying as return-on-investment leaders. Deloitte, Oct 2025.	Open to your entire workforce, with no licence attached.

WHAT THE PROGRAMME REMOVES

- Shadow AI use
- Prompt guesswork
- Tool sprawl
- Uneven AI literacy
- Untracked AI data

BEGIN WITH ONE DEPARTMENT

Run Version 1 as a pilot, measure the result, then decide. That decision belongs to you, not to us.
